	Sem-2		10263		4929		170		0	17227

**COMMENTAIRE :** Les concentrations de spores de moisissures sont encore faibles mais pourront augmenter lors des journées humides.

Les ascospores et cladosporium sont en tête du classement des moisissures de la semaine.

Attention aux spores de cladosporium et alternaria qui sont très allergisantes et bien présentes dans l'air dans plusieurs villes.
